

Sanaubar's Value:

- 1- collaboration: We must all collaborate as Jordanians and refugees to revive the Earth.
- 2- Sustainability: We do not create only temporary solutions in the camp to confront the effects of climate change. Rather, the results of the project are sustainable, even in the long term.
- 3- Responsibility: The project promotes a sense of responsibility among the residents of the camps. It encourages them to take ownership of their environment and for their actions to preserve the camp.
- 4- Eco-friendly: We should not use any materials that are harmful to the environment, even if they have temporary positive results.
- 5- Hope and positive change: Cultivating hope for a better future in the hearts of refugees. Enhancing the feeling of belonging to this camp when starting to make positive change.
